FOREWORD

In offering this catalogue to the collectors of the world it has been found necessary to conform more to the exhibition of types rather than to attempt a highly specialized list of dates and minor varieties, although I have given much information along these lines. The book has been produced for the general collector of gold coins and contains most of the information he is apt to require. It must be understood that where a valuation is given covering a period of years that the amount expressed is for the commonest date of the type in very fine collectors' condition. Specially required dates may be worth a great deal more. Where a valuation is not expressed, it may be assumed that the coin rarely comes up for sale. The author will be grateful for information as to any corrections or additions.

WAYTE RAYMOND.

The Mormons established their mint to coin the large quantities of gold dust received from California. All the coins were short weight in comparison with the regular U. S. coinage. The 20 Dollar piece was the first coin of this denomination to be struck in the country. It had an intrinsic value of only \$16 to \$18. The letters G.S.L.C.P.G. = "Great Salt Lake City Pure Gold."

The order, suspended from collar, appears on one variety of the doubloon in each date; on the other it is high on the neck. The chain and order of the Fleece appear on the reverse of this denomination only.

The order with chain appears on reverse of all the coins in this and following issues. Between 1773 and 1788 the mint mark and F.M. are upside down from a front view, in reality they continue around the circle of legend. There are some exceptions to this peculiarity.

Although this coinage presumably ended in 1870 as the first coins of the peso system bear that date, I have seen onzas of 1871 from Zacatecas and Hermosillo and those of the latter mint dated 1873. The Maximilian coinage does not appear to have materially interfered with the striking of the type as I have seen coins dated 1865 from Mexico, Hermosillo, Chihuahua and Zacatecas, those dated 1866 from Chihuahua, Culiacan and Durango, while in 1867 more numerous mints were used.

Patterns in copper and in gold were struck at the Philadelphia Mint in 1871. The gold pieces are exceedingly rare and contained in only two collections as far as I know. The regular coinage for this republic evidently began in 1883 and may be described as follows:

20 Bolívares—\$12.50	10 Bolívares— \$7.50	5 Bolívares—\$20.00

This handsome set was prepared by the French engraver Barre and his name appears under the head. There is also a complete set of trial pieces marked ESSAI in field.

The initial coinage in 1875 seems to have filled all needs until 1885 when 20 and 100 Bolívares pieces were coined for several years. I have only seen the 100 Bolívares dated 1886 to 1889, while I have seen varying dates of the 20 Bolívares between 1885 and 1912. Specimens of the 50 Bolívares are known dated 1888 but the 5 and 25 Bolívares seem to have been struck only in 1875. The 10 Bolívares was not struck until recent years, the only date I have seen being 1930.
